## Asbestos Centre

Asbestos Centre is incorporated in the year 1996. We are ISO 9001:2008 Certified Company, We are engaged in Manufacturers, Supplier and Exporter of a wide range of Asbestos Products across the world.

Our range of products consists of Asbestos Industrial Packing & Insulation Products, Asbestos Packing & Sealing Products, Asbestos & Non-Asbestos Jointing Sheet, Asbestos Friction Products, and Non-Asbestos Packing & Sealing Products etc. These meet the demands of textiles asbestos products, gasket products, friction products.

### Manufacturing Unit

Our manufacturing unit has skilled team who has good knowledge on the material and its features and installation.

### Quality Assurance

We have qualified workers and well experienced quality testers to test the quality of the products.

### Client Satisfaction

We never compromise in providing service to our clients, which made us successful in the market.

### Large Production Capacity

We never compromise in providing service to our clients, which made us successful in the market

### Experienced R & D Department

Our R&D employees are well Experienced in all branches of packing and insulation industry.

### ISO certified Company

We are engaged in Manufacturers, Supplier and Exporter of a wide range of Asbestos Products across the world.

## Ceramic Fiber Cloth

Asbestos Centre Manufacturers Ceramic Fibre Cloth, Ceramic Rope, Ceramic Tapes. Ceramic Fiber Cloth are made from alumina-silica ceramic fibre, free of asbestos. These Ceramic Fiber textile materials such as ceramic fiber Cloth can be used in different industrial applications under temperatures up to 1260`C and have excellent chemical stability and strong resistance to thermal shock and corrosion attack. Exceptions are hydrofluoric and phosphoric acids and concentrated alkalis. Ceramic fiber cloth also resist oxidation and reduction.

If wet by water or steam, thermal properties are completely restored upon drying. No water of hydration is present. Ceramic fibre rope contain 15% organic carriers, which helps to establish physical formation of products. The carriers burn out at about 750 °F (400 °C).

## Ceramic Fiber Rope

Ceramic Rope is a compression packing for very high temperature duties. It is manufactured from an exceptionally stable fibre material that is soft, non-irritating, non-hazardous & is not limited by World Health Organisation or European Union restrictions.

These heat resistant fibres are produced using advanced chemical fibre technology. They are spun into a flexible yarn in the UK, together with a low percentage of glass fibre and Inconel wire reinforcement. Ceramic Fiber Rope, Tape, Cloth contains no organic agents or processing additives. It therefore retains its physical and chemical properties at very high temperatures and does not decompose into hazardous substances, as happens with many normal ceramics.

## Ceramic Fiber Tape

Ceramic Fiber tape is a woven fabric made from our high quality ceramic fiber yarn. The ceramic tape is reinforced with fiberglass filament. Ceramic fiber tape contains a certain amount of binder material which is normally burned at lower temperature and does not affect the insulation property.

Ceramic Fiber insulation fabrics tapes are woven in netted form made from Ceramic Yarn. Ceramic fiber insulation tapes are available in a variety of thickness from 2 to 10mm. The standard width of the Tape is 25mm to 100mm., Ceramic fiber insulation tapes are used for insulating covers or shields, cable or pipe wrapping, expansion joints, high temperature seals or gaskets.

# Ceramic Fiber Blanket

Ceramic Fiber Blanket is a needled blanket made from our ceramic Fiber. The blanket is Lightweight, Flexible and available in a wide variety of thicknesses, widths and densities.

Ceramic Blanket resists temperature as high as 2300° F. This material is lightweight and has very low thermal conductivity, excellent handling strength, low heat storage, thermal shock resistance and corrosion resistance (commonly used acid and alkali). It also provides excellent sound absorption and excellent fire protection.

## Chemical and Physical Data:

- Chemical Composition :  $\text{Al}_2\text{O}_3$ : 47%,  $\text{SiO}_2$ : 50%; Total  $\text{Al}_2\text{O}_3$  and  $\text{SiO}_2$  >97% ;  $\text{Fe}_2\text{O}_3$ : < 1.0%
- Fiber Physical Properties : Fiber Diameter: 3 – 4.5 microns; Fiber Shrinkage (1800°F, 3h): < 3.5%
- Working Temperature : 1,800° F for Continuous Use; 2300° F Maximum
- Specific Heat (@2000°F) : 0.27 Btu/lb° F
